The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5754682 to Katoh.

As to claim 1, Katoh discloses an image processing apparatus for processing the image data input from an image handling device (CRT) and then output the image data to another image handling device (printer) (Fig. 5), comprising:

black-adaptation correction means (Fig. 5, element 1; Fig. 6 and 13, elements 12-14) for correcting the image data, if the darkest point of the image handling devices

Art Unit: 2623

differ from each other (CRT's darkest point is different from that of printer because of ambient light and white point of CRT's self-emitting (col. 7 lines 39-56 and col. 9 lines 8-20), so that the colors of the images produced by the image handling devices are similar, wherein said black adaptation correction means utilizes a xyz coordinates of a black point (col. 9 lines 210lines 55, note that the effect of ambient light for darkest point is calculated into the coefficients for black correction) and a xyz coordinates of a white point (col. 8 lines 31-67, and col. 10 lines 26-67, note that the effects of white point is calculated into the coefficients of color appearance correction) (col. 8 line 3-col. 10 line 37, col. 18 line 43-col. 19 line 55, col. 20 lines 4-62).

As to claim 2, the claim is a corresponding method claim to claim 1. the discussions are addressed with regard to claim 1.
